

Musto clothing is recognized around the world for outstanding design and performance in the most testing conditions using the very best technical fabrics available.

To keep your products performing at their best, you can follow this simple guide on how to care for your technical clothing.

## WATERPROOF OUTER LAYERS

- After use, rinse off with fresh, clean water
- Do not store wet
- Reproof on a regular basis (how regular will be based on how often the garment is used) with a specialist reproofing product.

## DRYSUITS

- After use, rinse off with fresh, clean water
- Do not store wet
- Apply talc to latex seals
- Reproof on a regular basis (how regular will be based on how often the garment is used) with a specialist reproofing product.

## FOOTWEAR

- After use, rinse off with fresh, clean water
- Clean with fresh water and a non-detergent soap and rinse thoroughly
- Avoid contact with direct heat source
- Protect and reproof with specialist products.
- Do not store in direct sunlight

**For the rest of our clothing ranges, please follow the care and wash instructions on the label inside the garment**
