

NATIVE®

- How can I further protect my Native sunglasses?

We recommend that you keep your Natives protected in their case when not in use. Do not place the lenses face down on any surface or leave them loose in a pocket or purse where objects may damage the lenses. Also, do not leave your sunglasses in intense heat (i.e. a car's dashboard) or anywhere with extreme hot or cold temperatures.

- How should I clean my frame/lenses?

First, blow off any particles that may be on the lenses. Second, use the cleaning cloth or softcase that came with your sunglasses to clean your lenses. You may use mild liquid soap diluted with warm water. We recommend using a soft, lint-free cloth for drying. If your cleaning cloth or softcase gets dirty, it is okay to hand wash and hang it to dry.
