

Q. How do I wash/care for my OluKai footwear?

For Mauka Collection (leather) footwear:

- To treat day-to-day wear for lighter colored leathers, nubuck, and suede we recommend using nubuck cleaner and conditioner. For full grain leather we recommend cleaning with saddle soap or leather cleaner and conditioner. You can find these products at most footwear dealers and/or shoe repair shops.

For Makai Collection (synthetic) footwear:

- We recommend cleaning with mild soap and cold water. To remove excess dirt or spot clean, use a stiff brush or soft cloth. Synthetic sandals may be cleaned in your washing machine using mild soap and cold-water temperature setting.
- After cleaning let your shoes or sandals air dry away from heat.
